

C6 glioma cells: transfection of plasmid DNA

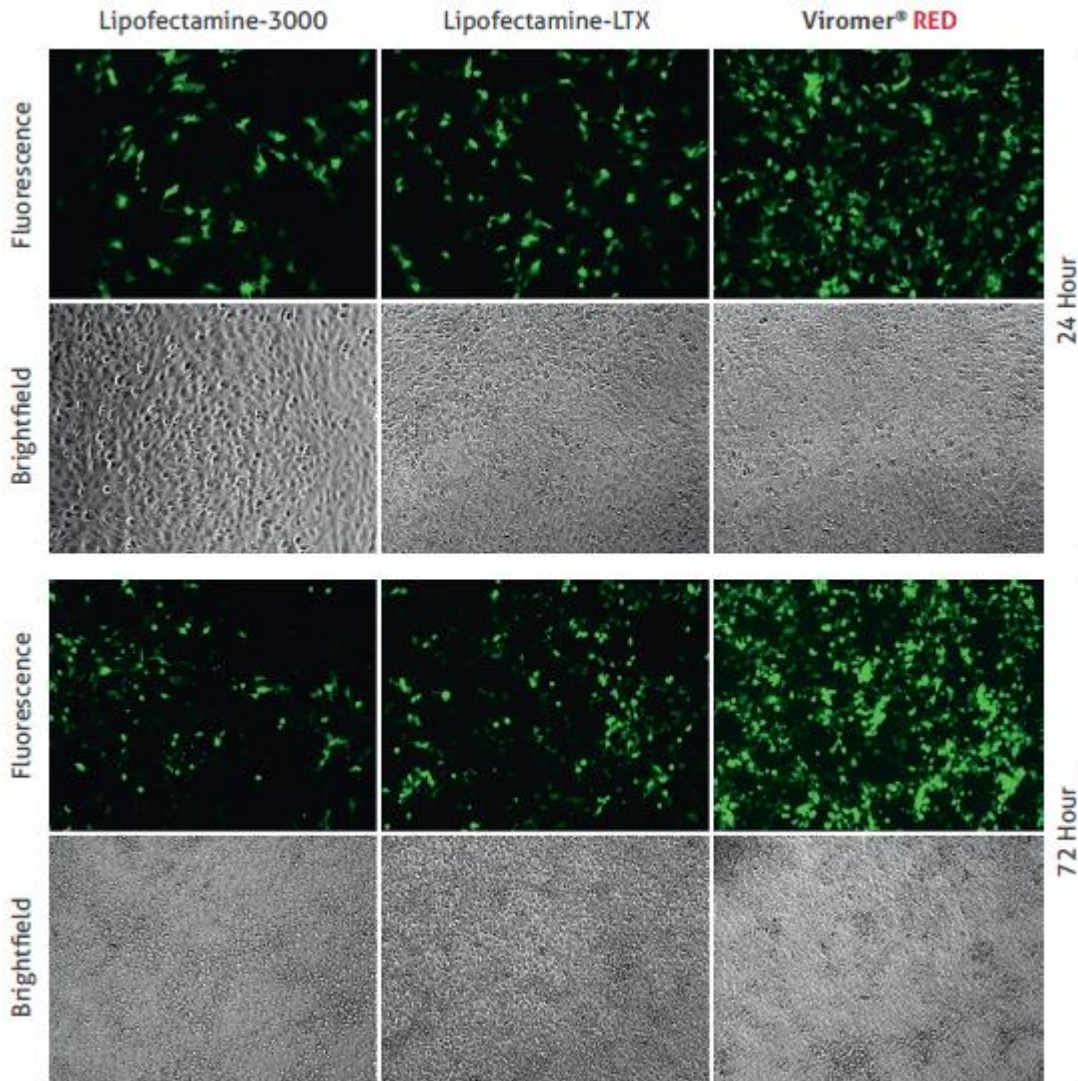

Fig. 1: Comparison of GFP expression in C6 glioma cells after plasmid (pMaxGFP) transfection with Viomer® RED, Lipofectamine® 3000 and Lipofectamine® LTX

"Given the efficiency we saw, your product might be uniquely poised to address many research questions using this clinically relevant cell line. Viomer Red showed faster and better transfection efficiency in Glioma cell line as compared to Lipofectamines."
